

# Coded Value Adder Plus

**A Value Transfer Machine That Can Add Value to SmartCards and Dispenses SmartCards Without Cash**

The Coded Value Adder Plus VTM (CVA Plus) is designed to add value to a SmartCard through the use of a generated code. The customer is instructed to visit a web site, or call a telephone number where they will specify an amount of value to be added to their card by exchanging their credit or debit card information for a numeric code. Once the code is obtained, the customer can go to the laundry where the CVA Plus is located, they will insert their SmartCard into the CVA Plus, enter the code on the keypad and the authorized value will be added to their SmartCard. All of this is made simple with a bi-lingual (English and Spanish) interface that directs the customers through each step.

The added feature on the CVA Plus is that a separate code, acquired the same way, will allow the resident to purchase a SmartCard. Many operators will load additional value on the SmartCards they disperse making it possible to receive a working card with a single code.

The CVA Plus is good for both customers and the operator; it eliminates the need for collections since no cash is accepted at the machine. Because there is no cash, a more secure environment is created in the laundry. The CVA Plus provides a way for customers to purchase a card on site and as an additional benefit the CVA Plus can be used to give instant refunds. If a machine fails, the customer can call a posted phone number and be given a code to replace the lost value on their card.

Front Access Only — 11-100-206
